To whom it may concern.

**Please dismiss Petition, RM-10740..**

I have been a licensed Amateur radio operator for over 35 years. The recent advancement of improved audio for SSB has sparked many people to increase their interest in this hobby, lead to better communications, encouraged fellow hams to participate in reducing IMD, and not least renewed the passion and respect for this fascinating hobby. I consider this a significant benefit for Amateur. Setting unneeded regulations to restrict experimentation is not in the best interest of this hobby.

I also find it very concerning the attitude and bias demonstrated by Mr. Riley Hollingsworth in this matter. Mr. Hollingsworth has done nothing constructive to resolve this issue and in fact has seemingly and purposefully undermined any positive activities to resolve. Mr. Hollingsworth closed mind has simply fueled the issue to the level it is today. I do not believe he is operating in the best interest and spirit of Amateur radio as a whole.

**Please dismiss this petition. It makes no sense.**
